PDF Bench Sample Document

This is a simple test document for the PDF-Bench benchmarking suite.

Introduction

PDF-Bench is an open-source benchmarking suite for evaluating PDF-to-Markdown conversion systems. It provides a standardized framework for comparing different parsers and APIs.

Features

The benchmarking suite includes several key features:
- Support for multiple parser systems
- Comprehensive evaluation metrics
- Caching system for performance
- Extensible architecture

Conclusion

This sample document demonstrates basic text extraction capabilities. More complex documents with tables, images, and formatting will be added to the test suite.
